

STELTRONIC NEWS

CERTIFIED PRE-OWNED AUTOMATIC SCORING

PLENTY OF UPGRADES

During this past winter season, Steltronic was hard at work upgrading many bowling centers with Steltronic WINS hardware and converting them over to the new Steltronic Focus scoring system. The response has been overwhelming with many lanes of scoring traded in, and the best part of this upgrade process was the bowling centers keeps most of their existing hardware which in turn keeps the price down.

TIME TESTED TRADE-INS

One benefit for the existing customers when upgrading to the new Vision lane computer, is the existing lane computers are worth substantial trade-in value. Steltronic has received many of the WINS hardware lane computers as part of the trade-in program, and now we have the hardware for sale at substantial price savings.

NEW VS. PRE-OWNED

When you think of this hardware as used, think more along the lines of its history within the bowling center. If you have the opportunity to purchase some hardware that comes with an additional one-year warranty, and has been in use already, one might say that hardware is time tested and has a proven track record of superior performance. These re-certified electronic lane computers have new hard drives and cooling fans, assurance that

New Versus Used

all 'moving' parts have been replaced with brand new hardware.

LIMITED INVENTORY

The amount of re-certified hardware is limited in quantity, and remember with Steltronic hardware, it's not obsolete, it's time tested. Our re-certified scoring hardware has a one-year warranty and with other items besides the lane computer hardware, the front desk and peripherals are new with our standard two-year warranty. Steltronic continues supporting our scoring systems that were installed back in the 80's, and today with more

than 19712 lanes of automatic scoring installations worldwide, a milestone worth stating that Steltronic hardware and software placing your business leap years ahead of the rest.
