WHAT REALLY GOES INTO A POINT OF SALE

SELL IT WITH EASE!

The Steltronic point of sale system included with Focus software is a full fledged, stocked with all the toys, bells, and whistles you could ask for to effectively run your food and beverage, along with pro-shop items. With the ability to program your system to be specific to the location, ie, your bartenders will not see the pro-shop items, along with additional features such as running a bar tab are all handled with ease. Use your own custom images for easy to find icons, or if you're into the high-tech, use a bar-code scanner to automatically sell the products in your system instead of trying to find them on the many pages of items you setup. Why not go REALLY BIG and install one of the liquor control systems and let it ring up automatically into the Focus point-of-sale system?

CUSTOMIZE THE ORDER

Everyone knows, the simplest pizza could be made in hundreds of different combinations, so we thought about that for you. Simply sell a pizza, then "add" items to the pizza and have the total adjusted immediately, with the click of a finger. You can even type in a hand written message, like "No ketchup", and what lane number the order should be delivered to. And let's not forget the bartenders, they sell alcohol, then add the mixers, again all handled by Focus. All of the items sold in your business are directly routed to the printer of your choice, so the bartender gets the drink

Steltronic Point-of-Sale

orders while the kitchen gets the food orders.

SELL IT EVERYWHERE

When you have food and beverage along with bowling and pool tables, the Focus system will keep track of where it's all going, if you allow the pay later system for the big parties. Selling food and drinks to an entire lane, or an individual on the lane, a pool table, or keep it on a tab for the ones who will pay later is all managed efficiently.

TAXES ARE A FACT OF LIFE

With many states wanting to collect sales taxes in different percentages based on the item sold, we have you covered with

the ability to assign any number of taxes to the products you sell, including bowling and pool tables. If you prefer to stay away from pennies, customize your system to round up to the nearest amount of your choice, just another way to handle your business with all the customizations you have asked for.
