NOVA

**The Next Generation of
Bowling Center Management**

Delivering scoring innovation worldwide since 1980

Built on Experience Designed for What's Next

One Platform Total Control

For over four decades, Steltronic has delivered dependable, innovative technology to bowling centers around the world.

NOVA represents the next evolution of that experience — a modern platform built to meet today's expectations and tomorrow's opportunities.

NOVA combines scoring, operations, and system management into a single, streamlined environment designed for performance, flexibility, and longevity.

NOVA is a unified software platform that manages every aspect of your bowling center — from the lanes to the front desk and beyond.

Designed with clarity and efficiency in mind, NOVA simplifies complex operations while giving operators powerful tools to manage scoring, guests, staff, and business performance.

Everything connected. Everything intentional.

A Modern Experience for Bowlers

Today's bowlers expect more than scores on a screen. NOVA delivers a visually engaging, interactive experience that enhances every game.

Clean graphics, smooth animations, and customizable visuals create an environment that feels modern, exciting, and easy to enjoy — for casual players and league bowlers alike.

Fun for Every Generation.

Designed for Operators, Not Just Screens

NOVA is built to simplify daily operations without sacrificing control. Intuitive workflows help staff work faster and more confidently, while powerful management tools provide insight into performance, revenue, and activity.

Operators gain visibility. Staff gains efficiency. Guests gain a better experience.

Simple. Powerful. In Control.

Hardware Designed to Fit Your Center

Purpose-built hardware engineered to support NOVA — reliably and flexibly.

Scoring Consoles & Touch Screens

Available in single or dual touch configurations to match lane layouts, player flow, and center preferences.

Player Keypads & Interfaces

Durable player input devices designed for high-traffic bowling environments and seamless system interaction.

Lane & System Hardware

Industrial-grade hardware designed for dependable performance behind the scenes.

Built for Real Bowling Environments

- Designed for continuous daily operation
- Flexible configurations for different lane layouts
- Seamless integration with NOVA software
- Built for long-term serviceability

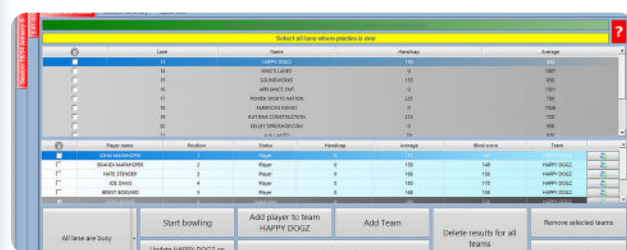

Hardware that works with your center — not around it.

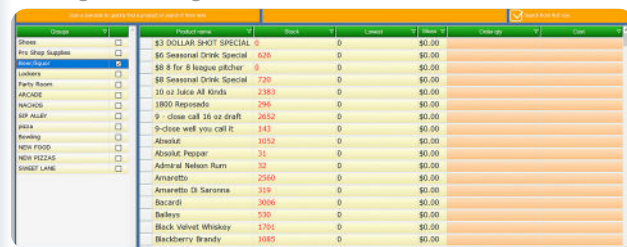

Bold by Design – Powerful by Nature.

NOVA introduces a boldly modern interface designed to feel fast, clean, and intuitive. Every screen is crafted to reduce time, improve clarity, and support confident decision-making.

This is not a refresh.
This is a new foundation.

Simple. Powerful. In Control.

A Smarter Long-Term Investment

NOVA is designed for longevity. With ongoing development, free software updates, and free technical support, your system continues to evolve without forced upgrades or surprise costs.

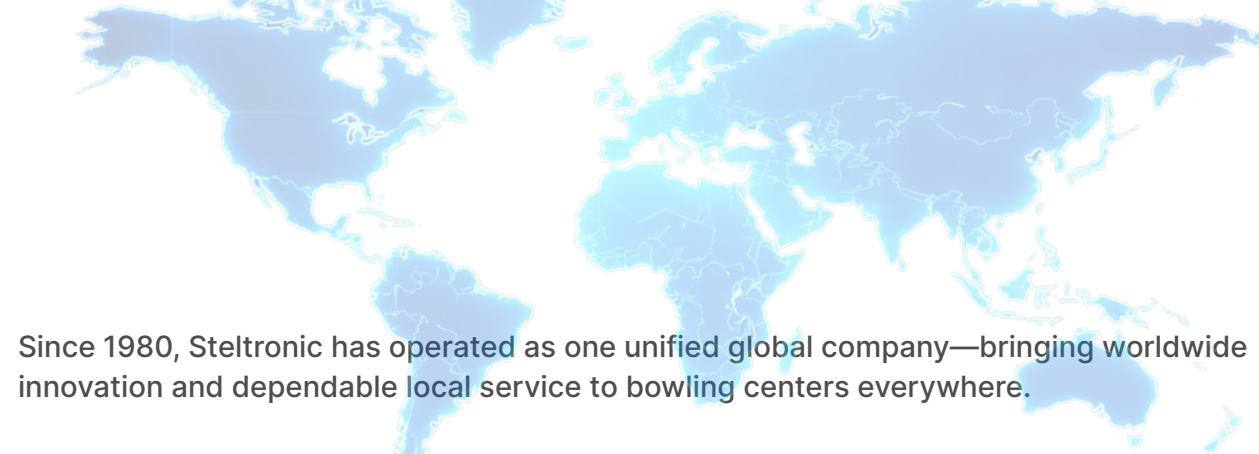

Your investment grows with your business — year after year.

Reliable, Supported, Future-Ready

Global Roots. Local Support.

Since 1980, Steltronic has operated as one unified global company—bringing worldwide innovation and dependable local service to bowling centers everywhere.

Expert support is always within reach.

Technology You Can Trust

NOVA reflects everything Steltronic stands for — reliability, innovation, and long-term partnership. It's technology designed to perform today and adapt for what comes next.
